Update of standard line-up of small size TFT LCD panels by Seiko Instruments

New 7.0", 2.4" and 2.8" modules have been released. The patented Fringe Field Switching (FFS) cell structure provides extremely wide viewing angle up to 170 degrees in horizontal and vertical direction, combined with a very high contrast as well as unmatched readability in sunlight due to an extraordinary bright backlight (450 cd/sqm).

These new modules are available with an optional resistive touch-panel and, caused by the compact construction (3.3 mm thickness), they perfectly fit for the use in various portable devices. Due to long-term product availability policy, these modules are suitable for industrial applications.

Available modules of this series are:

Resolution Size	QVGA (320x240) Landscape	QVGA (240 x 320) Portrait	WQVGA (480 x 272) Landscape	WVGA (800 x 480) Landscape
2.4"		24QVF0H 24QVF1J		
2.8"		28QVF0H 28QVF1J		
3.5"	35QVW1H 35QVW1T			
4.3"			43WQW1H 43WQW1T	43WVF0H 43WVF1G
7.0"				70WVW1A 70WVW1T

Color explanation: **Touch Panel Models**

FFS technology (usable in portrait or landscape mode)
